Proposal

Testimonials, team, pricing & engagement model

Who We Are

Enov8 Technologies Ltd. is a Nigerian-based technology company delivering end-to-end digital solutions across software development, managed IT services, hardware supply, cloud infrastructure, and licensing. We are a forward-thinking team of developers, designers, project managers, and technology strategists united by one purpose: turning complex technology challenges into competitive advantages for our clients.

Founded on principles of quality, innovation, and client partnership, Enov8 serves clients across fintech, education, e-commerce, healthcare, transport, and the public sector. From a startup's first digital product to an enterprise's cloud migration, we deliver technology that is built to last and designed to grow.

Technology Partners

V

Our Vision

To be the most trusted technology partner for businesses across Africa — delivering world-class digital solutions that are accessible, scalable, and built for the future of the continent's digital economy.

"The technology your organisation needs to compete globally should not require a global budget. We are here to close that gap."

M

Our Mission

To empower businesses and institutions with innovative, reliable, and tailored technology solutions — spanning software development, managed services, hardware infrastructure, and cloud platforms — enabling them to operate efficiently, scale confidently, and compete without limits.

Innovation First

Quality-Driven Delivery

Client Partnership

African Excellence

Our Core Values

The principles that guide every line of code, every client conversation, and every decision we make.

Quality Excellence

We do not ship what we would not stand behind. Every deliverable meets our internal standard before it meets yours.

Innovation

We stay ahead of the curve — adopting modern technologies, frameworks, and methodologies so you don't have to.

Client-Centric

Your goals are our brief. We listen deeply, advise honestly, and build exactly what your business needs — no more, no less.

Industry Expertise

Our team brings cross-sector experience in fintech, transport, education, e-commerce, and public infrastructure.

Integrity

We are transparent about timelines, costs, and limitations. You will always know exactly where your project stands.

Scalability

We build with growth in mind. Our solutions are architected to scale with your business, not against it.

Why Organisations Choose Enov8

In a market crowded with generalists, Enov8 is a specialist with full-stack capacity.

01 One Partner, Full Stack

From UI/UX design to backend APIs, cloud hosting to hardware supply — you coordinate with one accountable team, not four vendors.

02 Built for Africa's Market

We understand the constraints: bandwidth, cost, infrastructure gaps. We build solutions optimised for your operating environment.

03 Global Standards, Local Price

Our technology stack and delivery standards match global agencies. Our pricing reflects Africa's economic reality.

04 Post-Launch Partnership

We don't disappear at go-live. Every engagement includes post-deployment support, training, and a growth roadmap.

Complete Technology Services

Six integrated service areas — delivered by one team.

Custom Software Development

Web apps • Mobile (iOS & Android) • Enterprise systems • API integration • UI/UX design

Managed IT Services

Infrastructure management • Helpdesk • Monitoring • Security • IT consulting & strategy

Hardware & Consumables

Servers • Networking equipment • Workstations • Printers • Cables • IT consumables supply

Cloud & Digital Transformation

AWS • Azure • Google Cloud • Migration • DevOps • CI/CD • IoT • AI integration

Licensing & Renewals

Microsoft • Adobe • Antivirus • ERP • Procurement advisory • Volume licensing management

Infrastructure & Procurement

Data centres • Network design • Structured cabling • Full ICT procurement & deployment

Custom Software Development

From concept to deployment — we design, build, and ship software that aligns with your goals and scales with your ambition.

Technologies We Use

React · Next.js · TypeScript

Node.js · Python · Java

React Native · Flutter

PostgreSQL · MongoDB

Docker · Kubernetes · AWS

Figma · Adobe XD

What We Deliver

1

Mobile Applications

Native iOS & Android. Cross-platform React Native & Flutter. Enterprise-grade performance with App Store deployment.

2

Web Applications

SPAs, SSR, PWAs. Full-stack builds with clean code architecture, API design, and microservices.

3

Enterprise Systems

ERP, CRM, BI dashboards, legacy system modernisation, and cloud migration for mission-critical operations.

4

UI/UX Design

User research, wireframing, high-fidelity prototyping, design systems, and usability testing in Figma / Adobe XD.

5

API & Integrations

REST, GraphQL, third-party integrations, payment gateways, and real-time data pipelines.

Managed IT Services & Support

We manage your technology infrastructure so you can focus on your business. Proactive, responsive, and always on.

Infrastructure Management

Server administration, network monitoring, patch management, and performance optimisation for your IT environment.

IT Helpdesk & Support

Tiered support (L1–L3), remote and on-site assistance, SLA-driven response times, and issue resolution tracking.

Cybersecurity & Compliance

Threat monitoring, vulnerability assessments, firewall management, data encryption, and NDPR compliance advisory.

IT Strategy & Consulting

Technology audits, digital roadmaps, vendor selection, capacity planning, and CTO-as-a-service for growing organisations.

Backup & Disaster Recovery

Automated backups, recovery point objectives, business continuity planning, and tested disaster recovery procedures.

Network Design & Management

LAN/WAN design, structured cabling, VLAN configuration, VPN setup, and ongoing network health monitoring.

Hardware, Consumables & Licensing

HARDWARE & CONSUMABLES

Servers & Storage

Rack servers, NAS, SAN, storage arrays for data centres and branch offices.

Networking Equipment

Cisco, HP, and Ubiquiti switches, routers, access points, and firewalls.

Workstations & Laptops

Dell, HP, Lenovo enterprise-grade desktops and laptops with warranty.

Printers & Peripherals

HP, Epson, Canon — laser, inkjet, and MFP printers. Cartridges and toners.

Cabling & Accessories

Cat6/Cat6A structured cabling, patch panels, racks, and cable management.

SOFTWARE LICENSING & RENEWALS

Microsoft 365 & Azure

Business, Enterprise, and Education licensing. Setup, migration, and ongoing renewal management.

Antivirus & Endpoint

Kaspersky, Sophos, ESET — procurement, deployment, and renewal across your entire fleet.

Adobe Creative Cloud

Full suite licensing for design teams. Volume pricing and licence management.

ERP & Business Software

SAP, Odoo, QuickBooks — licensing advisory, procurement, and implementation support.

Zoho & SaaS Platforms

Zoho One, CRM, Desk, Projects, Books — full Zoho partner services including setup and training.

Cloud & Digital Transformation

We architect and migrate businesses to the cloud — securely, strategically, and with zero disruption to your operations.

99.9%

Uptime SLA Targeting

40%

Avg. Cost Reduction Post-Migration

3

Cloud Platforms Supported

24/7

Monitoring & Alerting

Cloud Strategy & Roadmap

We assess your current infrastructure, define cloud readiness, and produce a migration roadmap aligned to your budget and business objectives.

Cloud Migration & Deployment

Lift-and-shift, re-platforming, or full re-architecture — we migrate your workloads to AWS, Azure, or Google Cloud with minimal downtime.

DevOps & CI/CD Pipelines

Automated testing, containerisation (Docker/Kubernetes), and CI/CD pipelines that accelerate release cycles and reduce human error.

Data Analytics & AI Integration

Business intelligence dashboards, data pipelines, machine learning model integration (including Dyna.ai), and real-time reporting.

Process Automation & IoT

RPA for repetitive workflows, IoT device integration, and smart system design that connects your physical and digital operations.

Cloud Security & Compliance

Identity management, encryption at rest and in transit, security monitoring, and compliance frameworks for regulated industries.

Strategic Technology Partners

We partner with the world's most trusted technology companies to deliver best-in-class solutions to our clients.

AWS

Cloud Infrastructure Partner

Amazon Web Services — cloud compute, storage, databases, AI/ML, and serverless architecture. We design, deploy, and manage AWS environments at all scales.

Microsoft

Microsoft Solutions Partner

Microsoft 365, Azure, Teams, Dynamics 365, and Windows licensing. From SMEs to enterprise — procurement, setup, migration, and support.

Cisco

Cisco Technology Partner

Cisco networking: routers, switches, firewalls, and Webex collaboration tools. Structured network design and ongoing management.

IBM

IBM Technology Partner

IBM enterprise solutions: Cloud Paks, Db2, Security, and AI-powered workflows. Deployment and integration services for regulated industries.

Zoho

Zoho Authorised Partner

Full Zoho suite: CRM, Books, Projects, Desk, Campaigns, and Zoho One. Setup, customisation, data migration, and staff training included.

Dyna.ai

AI Solutions Partner

AI-powered business automation and analytics via Dyna.ai. We integrate conversational AI, intelligent workflows, and predictive analytics into your operations.

Our Delivery Methodology

A structured five-phase process — designed for transparency, speed, and zero surprises.

01

Discover

Deep-dive workshops to understand your goals, constraints, users, and systems. We document everything before we design anything.

02

Design

Wireframes, prototypes, system architecture, and brand alignment. You approve before a single line of code is written.

03

Develop

Agile sprints with weekly builds, daily standups, and a staging environment you can access and review throughout.

04

Deploy

Secure, optimised go-live with full testing, performance benchmarking, and a rollback plan in place before launch.

05

Support

Post-deployment SLA, staff training, content updates, monitoring, and a planned roadmap for Phase 2.

Post-Deployment Support

Go-live is not the end of our engagement — it is the beginning of the partnership.

Essential

Included

- 30-day post-launch bug-fix warranty
- Email & ticket support (48hr response)
- Documentation & handover pack
- Admin user training (1 session)

Standard

Monthly SLA

- 90-day technical support retainer
- Email + WhatsApp support (24hr response)
- Monthly performance report
- CMS content update assistance
- Security patch management

Enterprise

Custom SLA

- 12-month dedicated support retainer
- Priority support (4hr response, 24/7)
- Dedicated account manager
- Weekly status calls
- Proactive monitoring & alerting
- Quarterly product roadmap review

Our Portfolio

What We've Built.

Three showcase projects that demonstrate Enov8's capability across transport, corporate, and enterprise operations sectors.

01

Lagride Connect

Public Transport Web Platform

02

Zenvara Group

Corporate / Institutional Website

03

FleetView

Fleet Operations Dashboard

Lagride Connect

Public Transport Web Platform

A mobile-first route discovery and information platform for Lagos-corridor bus services — built for 42,000 daily commuters.

React + Next.js

Node.js API

PostgreSQL

Figma UI/UX

Cloud Deploy

The Challenge

Zero digital discoverability — no official web presence for routes or fares

No fare transparency, driving commuters to informal alternatives

No complaint or feedback channel — the operator was digitally silent

Our Solution

Mobile-first responsive website: route discovery engine, timetables, fare guide

CMS-powered admin backend — operations team updates content in under 4 minutes

SEO-optimised: 100% of route pages indexed on Google within 14 days of launch

2.3s

Mobile Load Time

18,400

Monthly Visitors (Mo. 2)

87%

Mobile Traffic Share

Zenvara Group

Corporate / Institutional Website

The Challenge

Existing site was 4 years old — did not reflect the firm's ₦28B+ project advisory track record

No CMS, no leadership profiles, no insights section — institutional capital going to waste

Senior partners were invisible online despite 15+ years of distinguished careers

Our Solution

Leadership-first architecture: each partner has a dedicated profile with career history and publications

CMS-managed Insights section: team now publishes 4 articles/month without developer involvement

+340%

Time on Site

vs Previous Site

38%

Bounce Rate

Industry avg: 65%

11

Qualified Partnerships

First 90 Days

FleetView

Fleet Operations Management Dashboard

A real-time web dashboard replacing spreadsheets and WhatsApp for a 120-bus Lagos fleet operator.

React + TypeScript

Node.js + Express

PostgreSQL

Chart.js Analytics

Role-Based Auth

Docker Deploy

05 PORTFOLIO

The Challenge

120 buses managed via whiteboard + WhatsApp — 6 missed driver shifts per month

No complaint tracking: zero reference numbers, zero resolution records

CEO made strategic decisions from handwritten weekly reports — no data analytics

Our Solution

Live fleet overview: all 120 buses visible in under 10 seconds from one screen

Centralised complaint inbox with auto-reference numbers, assignment, and escalation triggers

Analytics module: route efficiency scores, on-time rates, fuel spend — fully automated reports

0

Missed Shifts Post-Launch

91%

Complaints Resolved in 24hrs

99.7%

System Uptime

What Our Clients Say

“

Enov8 didn't just build us a website — they built us a digital presence. The site was delivered on time, looked exactly like what we envisioned, and their team was available every step of the way. We now receive qualified partnership enquiries directly through it.

C

Chief Operations Officer

Infrastructure Advisory Firm, Lagos

“

What impressed me most was how they understood our transport operations problem before they started designing. The FleetView dashboard transformed how we manage our fleet. We went from controlled chaos to complete visibility. The ROI was visible within weeks.

M

Managing Director

Urban Mobility Operator, Lagos

“

We've worked with two other agencies before Enov8. The difference is night and day. They communicate clearly, they deliver what they promise, and they're still available months after the project went live. That post-launch support made all the difference.

H

Head of IT

Financial Services Organisation, Abuja

The Team Behind Your Project

Every engagement is staffed with a dedicated cross-functional team — from discovery through to post-launch support.

Project Manager

Owns the timeline, stakeholder communication, and delivery accountability. Your single point of contact throughout.

UI/UX Designer

Leads user research, wireframing, and high-fidelity design. Ensures every screen is intuitive, accessible, and on-brand.

Frontend Developer

Builds the client-facing interface in React/Next.js. Responsible for performance, responsiveness, and pixel-perfect implementation.

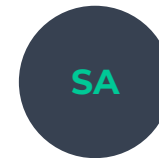

Backend Engineer

Architects APIs, databases, CMS systems, and server-side logic. Ensures scalability, security, and data integrity.

QA & Test Engineer

Runs functional, mobile, and security testing across all stages. Nothing ships without QA sign-off.

System Administrator

Manages hosting, domain, deployment, monitoring, and post-launch infrastructure. Ensures 99.9% uptime.

Pricing & Engagement

Flexible, transparent pricing — aligned to your budget, scope, and timeline.

Fixed-Price Project

- Defined scope & deliverables
- Clear milestone payments
- Ideal for websites, apps, and defined builds
- Price agreed upfront — no surprises

Time & Materials

- Flexible scope for evolving requirements
- Transparent hourly/daily rate
- Suited for complex enterprise projects
- Weekly billing with full visibility

Managed Service Retainer

- Monthly or annual engagement
- Dedicated technical team hours per month
- Ideal for ongoing IT management & support
- Priority SLA with predictable monthly cost

All proposals include a detailed line-item quote. Volume discounts available for multi-phase engagements. NGN & USD pricing available.
